▶ ABOUT POLY-AG

Poly-Ag Corp. and its partner A.A. Politiv (1999) Ltd. specialize in the production of "smart" Horticultural Films. Established in 1985, we have become Israel's leading producer of horticultural films and a major supplier to the North American and international markets.

BENEFITS

**Durable
Excellent Top Layer Performance
Superior Puncture Resistance
90% Light Transmission**

▶ POLY-AG LOCATIONS

**Headquarters - San Diego, CA
Sales Office - San Diego, CA
and Rock Hill, SC
Customer Service &
Order Processing - San Diego, CA
Rewind & Distribution Center
- San Diego, CA
Manufacturing - Israel**

FEATURES

**Made From Latest Resin Technologies
High Clarity
Available in 8 mil
Superior Dart Impact Performance**

LIIGHT QUALITY

The total light transmission of the greenhouse covering is extremely important for Photosynthetically Active Radiation, 400—700 nanometers. The intensity of these wave lengths in the PAR range directly influences the growth and development of the plants.

Poly-Ag Corp specifically formulates its films for optimum performance related to crop response.

SUNVIEW 4

SunView 4 was developed to meet the growing needs of the growers in North America to produce quality crops.

Our High-Technology greenhouse films are based on the latest developments and technologies in the manufacturing process. SunView 4 is designed to transmit more light while maintaining superior mechanical properties.

* Sunview4 is available in 55% White
